Dear Clients,

It's on again, Roseville Corriedale's 4th on property sale.

With the season being very dry everywhere, it has been a real challenge for us all.

There's no better time than the present to think Roseville Corriedales; for we are the true dual purpose sheep. With prices for meat and wool at record highs, it is a sure sign of a bright future for our industry and the Corriedale breed.

With the inquiries we have had in past few years we believe the Corriedale is having a revival, this is making people realise the value in Corriedales again.

This is a great time to have Corriedales. Yet again we have had our best wool sales, with our main lines making up to 1390c at auction on the day, with several processors really showing strong interest in our Roseville brand. Our Ewes are cutting 6.7 kgs of wool and our lambs are averaging \$150 per head nett all lambs sold, with all lambs gone at 6 months of age. After the tough conditions at the start of the year our ewes joined well, taking in the long dry time we had, the ewes scanned at over 164 percent which we were proud of in these conditions.

We are fiercely proud of what we can achieve with our Corriedales and are always looking to find ways to improve our genetics, to provide our clients with quality sheep, through using our performance Corriedale group which is involved with other like minded studs from around Australia and New Zealand.

The rams this year are again looking great. Ebv's will be available with all sheep genetics and fleece results on the 40 rams on offer. We will have the rams individually penned to try and make your selection easier.

We look forward to seeing you on Sale Day, Friday the 12th October 2018 at 2pm with a bbq lunch provided.

If you have any further inquiries or would like a catalogue don't hesitate to contact us.

Yours,

Tony, John, Judy & family.
